

POOJA PHANENDRA PRATHI

Windows Server Administrator | Wintel Administrator

[Linkedin](#) | Email: phaniprathi10@gmail.com | Mobile: +91 9490880810

PROFESSIONAL SUMMARY

Experienced Windows Server Administrator with 3+ years of expertise in managing and supporting enterprise Windows Server environments (2016/2019/2022), VMware, SCCM, Active Directory, patch management, infrastructure operations, and ITIL-based support processes. Skilled in managing production and non-production environments, troubleshooting Windows server and network-related issues, administering user access and security policies, and ensuring high system availability. Hands-on experience in VMware, server monitoring, backup operations, SCCM client support, incident management, and infrastructure maintenance activities. AWS Cloud Practitioner certified and available for immediate joining.

TECHNICAL SKILLS

- **Windows Server Administration:** Windows Server 2008/2008 R2, 2012/2012 R2, 2016, 2019, 2022 Operating Systems.
- **ITIL & Ticketing Tools:** ServiceNow, ITIL Processes, Incident Management, Change Management, Request Fulfilment, Escalation Handling, SLA Management, Service Management
- **Active Directory:** User & Group Management, DNS, DHCP, GPO
- **Virtualization:** VMware vSphere, vCenter, Hyper-V
- **Backup & Recovery:** Troubleshooting Backup Failures
- **Monitoring/Troubleshooting:** Dynatrace Monitoring, System Monitoring, Low Disk Space, CPU Utilization, Service Restarts, Event Flow, PowerShell.
- **Patch Management:** Monthly Patching for Physical & Virtual Servers
- **Cluster Management:** Handling Cluster Node Failover Issues
- **Compliance & Audit:** Inventory Management, MFSA Issues, CMDB Maintenance
- **Vendor Coordination:** Hardware Replacements, Upgrades, and Maintenance for IBM/HP/Dell servers
- **Data Center Operations:** Cable Testing, Server Restarts, Server Physical Validations, Visual Inspection

EXPERIENCE

Windows Admin | Windows Administrator

DXC Technology | December/2022 to May/2026 (3.4 Years)

- Managed Windows Server environments including Windows Server 2008, 2012, 2016, 2019, and 2022 across production and non-production environments.
- Installed, configured, administered, and monitored Windows servers, services, and roles to ensure high availability and system reliability.
- Performed server health checks, troubleshooting, maintenance activities, and issue resolution with minimal downtime.
- Managed user access, security policies, and administrative permissions in Windows environments.
- Support Active Directory services including user and group management, DNS and DHCP services and resolved network connectivity issues.
- Worked on VMware vSphere environments including VM provisioning, snapshot creation, snapshot revert, CPU/memory allocation, disk expansion activities.
- Supported VMware virtual machine troubleshooting and coordinated with infrastructure teams during planned maintenance activities.
- Performed monthly patch management activities and coordinated production changes aligned with ITIL change management processes.
- Worked on System Center Configuration Management (SCCM) client installation, SCCM client version upgrades, troubleshooting SCCM communication issues, and deployment-related activities.
- Used PowerShell for service status monitoring, service restarts, patch verification, and writing basic scripts to automate Windows administration tasks.
- Performed capacity management activities by monitoring server CPU, memory, disk utilization, and ensuring adequate resources for production environments.
- Worked on incident management, problem management, and change management processes using ServiceNow ticketing tool.
- Coordinated with application teams, network teams, and security teams during deployments and infrastructure changes.
- Supported backup operations, restore activities, and disaster recovery procedures for Windows systems.
- Maintained system documentation, configuration records, audit compliance details, and standard operating procedures.

- Troubleshoot Windows OS issues, hardware-related incidents, performance bottlenecks, and network connectivity problems.
- Ensured SLA compliance and timely resolution of P1, P2, and P3 incidents.
- Handle Windows Failover Cluster environments by troubleshooting node failures and performing failover operations with minimal service disruption.
- Manage vulnerability remediation activities including security patching, server hardening, and audit compliance requirements.
- Maintain operational documentation, standard operating procedures (SOPs), and knowledge base articles while supporting on-call activities for priority incidents.
- Conducting collaboration calls with Customers and External Vendors to discuss ongoing issues and challenges.
- Provided Windows Server administration and support for US, UK, and Canadian clients, ensuring high availability and timely incident resolution.
- Generate infrastructure health, capacity, and availability reports for production environments to support operational planning and performance improvements.
- Exploring cloud technologies and gaining hands-on knowledge in AWS cloud services and infrastructure management.

EDUCATION

Master of Computer Applications (MCA) Vignan University	2023 - 2025
Bachelor of Science in Computer Science Aditya Degree College	2019 –2022

CERTIFICATIONS

- **AWS Certified Cloud Practitioner** - Foundational certification in cloud concepts, security, and AWS services.
- **Oracle Cloud Infrastructure Associate** - Certified in core OCI services and cloud fundamentals.

PROFESSIONAL ACHIEVEMENTS

- **Deliver Award**
Recognized for successful VM Tools Upgradation across production servers with minimal downtime, ensuring business continuity and service stability.
- **Champions Award**
Recognized for excellence in Configuration Management, specifically for resolving system CI audit errors and improving compliance accuracy.
- **Process Improvement Star Award**
Automated a manual approval workflow using PowerShell, reducing processing time and manual effort by 30%, improving accuracy for a team handling 100+ approvals per month.
- **Collaborate Award**
For excellent teamwork, collaborating across teams, and delivering effective solutions.
- **Collaborate Award**
Achieved 99% average Windows patch compliance over six months by executing disciplined monthly patching cycles with zero unplanned outages and minimal incidents.
- **Client & Management Appreciation**
Received multiple commendations from clients and delivery managers for exceptional support, timely incident resolution, and consistent service delivery excellence.

INFRASTRUCTURE OPTIMIZATION & ENHANCEMENTS

- Led the planning and execution of HPSA issue resolution by installing/upgrading HPSA agents on 1000+ Windows servers. Achieved 100% server monitoring coverage, improved operational efficiency by 40%, and significantly reduced manual effort.
- Implemented a mandatory Configuration Item (CI) field in ServiceNow Incident forms after audit findings, ensuring all incidents include the server’s name before closure - improving data accuracy, compliance, and traceability across the Wintel tower.
- Identified and resolved IP mismatch issues between HP OVO database and Windows servers. Fixed 100+ servers running Windows Server 2012/2016/2019, refined monitoring accuracy, ensured complete and reliable server monitoring, and reduced unnecessary incident triggering.
